

ECOFECTIVE CAT & DOG REPELLENT SPRAY

An effective treatment with harmless scents that discourages cats and dogs from fouling both in the home and the garden areas on doorways, carpets, furnishings, driveways, paths, patios, flower beds, dustbins, fence posts etc. For use only against cats and dogs. Do not use where human or animal food or water could become contaminated. Ecofective Cat & Dog Repellent Spray contains Methyl Nonyl Ketone 3.47% w/w. **Directions for use:** Remove any solid excreta. Wash down fouled areas with clear water. Shake bottle before use. Spray onto and around soiled areas. Can be repeated every 12 hours if required to deter particularly persistent pets. Use avoid over-application. Do not use near ornamental ponds, or those containing fish, edible crops and do not apply direct garden or houseplants as this may cause 'spot burning'. Do not use on painted or varnished surfaces. Indoors, test on a small hidden area of carpet, furnishings etc. before use to test for colour fastness. Wash hands after use.

STATUTORY CONDITIONS OF APPROVAL RELATING TO USE: FOR USE ONLY AS A VERTEBRATE REPELLENT.

Scatter product so that 100g will cover 11-22 square metres of area. Users must comply in full with all their legal responsibilities under the Control of Pesticides Regulations 1986 (as amended), including complying with all Conditions of Approval.

READ ALL PRECAUTIONS BEFORE USE

HSE No.7704/PCS No.94919

ECOEFFECTIVE CAT & DOG REPELLENT CRYSTALS

are effective in all weather conditions, slowly releasing a strong, highly scented odour which confuses both cats' and dogs' sense of smell. Over a period of weeks, they will be trained to move away from the treated areas to those where they can detect evidence of previous fouling odours. The crystals are approved for use on concrete, paving and around lawns and plant beds when used as directed. This bottle should treat 51 square metres. Ecofective Cat & Dog Repellent Crystals contain Methyl Nonyl Ketone 1.62% w/w.

Directions for use: Remove remains of previous fouling and hose area or wash down with clear water. Lift cap and perforate seal several times. Scatter the crystals sparingly onto the ground, avoiding direct contact with soft stemmed plants, grasses and leaves, as some discolouration may occur. (To minimise this, only lightly scatter the crystals onto the lawn). Keep away from fish ponds. Fresh dug ground may need only one application, while previously fouled areas may need several applications (at 2-3 day intervals) to achieve best results. Protect from heat and frost. For more information, scan the QR Code below.
