ECOFECTIVE HOUSEPLANT BOOST

is ready to use with NO MIXING. Produced from a blend of natural ingredients, sugars, amino proteins and phosphate, which provides a balanced feed for plants along with a biostimulant which encourage the plants to take up nutrients quickly, giving good results sooner and is suitable for most houseplants, indoor grown capsicums (chillies, peppers) and herbs.

Some plants require specialist feeding, so check with your plant supplier to ensure you have the right feed for your plants.

Directions for use:

Water plants and then apply one capful of feed to the base of the plants, avoiding the foliage.

Apply every 7 days during the growing season.

Typical Analysis% w/w	NPK 2-1-3
Nitrogen (N)	0.016%
Phosphorus (P ₂ O ₅) total	0.008%
Potassium (K ₂ O) total	0.024%

Advice

Avoid applying in direct sunlight as this could cause scorching of plants. If applying to foliage, do not apply when temperatures are expected to reach over 30°C. Avoid applying when the soil is dry and the plants are suffering from moisture stress.

Store in a safe dry place away from children and pets. Keep container upright during storage and transit. Wash hands after use.
