HOUSEPLANT BUG CONTROL 500ml

ecofective® Houseplant Bug Control is a ready to use pesticide free spray for use on edible and ornamental indoor plants. Controls a wide range of pest species including Whitefly, Aphid, Red Spider Mites, Mealybug, Scale and Psyllid. Due to the physical mode of action these pests will not become resistant to the application. It also protects against powdery mildew by washing off the spores and foliar feeds on applying. No harvest interval is required meaning produce can be eaten within hours after application.

Wash well before consuming. Children and pets can continue to use the treated area after application.

Directions for use: Do not apply to plants which are in full sun in windows or conservatories - apply in these areas early morning, or late evening. Applying in strong sunshine can cause burning of the plants leaves. Always do a test area before treatment to ensure the plant can withstand the application.

SHAKE WELL before application. Turn nozzle to the 'ON' position, when finished applying turn back to the 'OFF' position.
