concentrate treats up to 125sq.m\*\*

MADE IN BRITAIN

ecofective®

NATURAL LAWN FEED CONCENTRATE

Derived from organic based ingredients such as molasses sugar and promotes healthy grass, to help reduce diseases and moss. Ideal for smaller urban gardens, or larger gardens with small lawn areas.

**When to use: March to October**

**Before application:** Early Spring treat any weeds or moss in the lawn. After weeds and moss have been cleared then start feeding the lawn. Feed every 4 weeks during the growing season, until the first frost arrives.

Do not feed directly after mowing your lawn, wait for 4 days to reduce the risk of damaging the newly-cut blades of grass.

**Application rate:** 2 inner capfuls (80ml) into 6 litres of water in a watering can. Shake well before opening.

**Directions for use:** Using the integral measuring cap, add 2 inner capfuls (80ml) into 6 litres of water, using a fine rose or sprinkler bar, apply the feed over 8 sq.m ensuring even application by using a sweeping motion.

**Do not apply 4 days before mowing. Can be applied after rain.**

**Advice:** Avoid applying in direct sunlight as this could cause scorching of grass blades.

Avoid applying when the grass is under stress from dry weather.

Store in a safe dry place away from children and pets.

Keep container upright during storage and transit. Wash hands after use.
