ecofective®

ROSE DEFENDER

A ready to use pesticide free spray that controls a wide range of pest species including Whitefly, Aphid, Red Spider Mite, Mealybug, Scale and Psyllid. Due to the physical mode of action these pests will not become resistant to ecofective® Rose Defender. It also protects against powdery mildew by washing away spores and foliar feeds on applying. The spray can be used on roses, as well as ornamental and edible crops, with no harvest interval so fruit and vegetables can be eaten within hours after spraying. Wash well before consuming.

Directions for use: Apply early morning or late evening. Always do a test before full application to ensure the plant can withstand the application. Do not apply in full sun as this may risk scorching of the plant. SHAKE WELL before application. Turn nozzle to the 'ON' position, when finished applying turn back to the 'OFF' position.

Application rate: Apply thoroughly to upper and lower leaf surfaces. Re-application can be applied weekly to keep full control of the pests.

Precautions: Keep out of reach of children. Keep spray off skin and away from eyes. If splashed in eyes or on skin wash in clean water. If medical advice is needed, have product container or label at hand. Wash hands after use. Store out of direct sunlight above 10°C and below 25°C. Children and pets can use the treated area after application. Keep bottle upright in transit and storage.

*Safe to use around children and pets when following the labels instructions for use.

Contents: A unique blend of plant safe, physical pest control surfactants. Includes nutrients for healthy plant growth, Magnesium, Iron, Manganese.
