BRITAIN

## ecofective® NATURAL WATER STORING GRANULES

A starch based hydrating granule which absorbs over 80 times its own weight in water. It then forms a gel around root systems that releases water to these roots when needed, reducing the need for watering, and helps to prevent leaching of nutrients. It is biodegradable, non-toxic, and odourless.

### Areas of use:

Hanging baskets, pots, tubs when planting out, potting up, transferring into gardens from pots.

**Application rates:** 1 heaped scoop = 5g approx.

When applying to compost/potting mix or soil then ensure the product is mixed in well before planting. Shake the pouch well before measuring out the required amounts.

### Use 2 scoops per 4-5 litres of compost/potting mix. Mix in well and use for the plants below:

Flowering plants in hanging baskets and tubs
Seed or plug plants
Greenhouse plants - Cucumbers, peppers, melons and tomatoes in medium pots
Tomatoes outdoors in medium pots

### Use 4 scoops per square metre of planting area:

Vegetables and salad crops (per sq.m) into outside garden areas.	For garden planting, apply 4 scoops evenly over the planting area and dig in well to a depth of 4 inches. If adding compost to the soil, add 4 scoops into 4-5 litres of compost, mix in well, then spread evenly over the ready dug area and turn into the soil to a depth of 4 inches.
--	--

### Use 2 scoops when transferring the below:

Shrubs/trees/roses/ transferred into the garden	Dig a hole to fit the root ball, add to this hole 2 scoops, evenly distributed around this hole, water lightly, plant the shrub and top up with soil or compost.
---	--

### General advice:

The produced gel mixed with the carrier may become slippery when wet, so sweep up spillages immediately.

Keep dry and re-seal after use.

Store away from children and pets.

Do not swallow or breathe dust. Wash hands after use.

\*Safe to use around children and pets when following the labels instructions for use.

Empty pouch is recyclable so dispose of in your recycling bin.
