ORGANIC SEAWEED

concentrated formula makes up to 50 watering cans**

MADE IN BRITAIN

ecofective®

ORGANIC SEAWEED

Produced from the best sources of organic seaweed and provides all plant types with an extra tonic boost during the growing season. It can also be used along-side your regular fertiliser without causing any problems of over feeding to the plants. The product is rich in carbohydrates which the plants take in and use as building blocks, and which also help to aerate the soil. Use on all types of plants both edible and non-edible and can be used as a foliar application.

Directions for use: Using the inner cap, measure up to the 30ml line then pour into 4.5ltrs of water in a watering can. Using a fine rose apply to the base of the plants. 4.5ltrs will cover up to 8 potted plants, you can also use your regular feed at the same time if required. A good tip is to water the plants first, wait 20 minutes for potting media to absorb the water, then apply the seaweed mix. This helps the plants to absorb the seaweed nutrients, and it will not leach out of the bottom of the pots. Apply weekly during the growing season. Can be applied to garden plants and indoor plants using the same measures. The product may have a strong smell because of the active bacteria within the product, and sometimes may be of a different colour.

Advice: Do not apply when temperatures are expected to reach over 30°C or in direct sunlight as this can burn the leaves. Store product out of direct sunlight, away from children and pets. Keep container upright during storage and transit. Although not required, we recommend that when gardening to wear gloves. Wash hands after use.

100% COLD PRESSED

FOR ALL PLANT TYPES

USED BY PROFESSIONALS

SUITABLE FOR ORGANIC GARDENING

Store out of direct sunlight in a cool place and store between 0 and 30°C.

*Safe to use around children and pets when following the labels instructions for use

**Makes up to 225 ltrs (approx. 50 gallons of feed)

Recycled and Recyclable
This bottle is made from 100% recycled materials. Bottle and cap are recyclable.
